

Birds of Eagle Marsh
Bar charts of frequency of occurrence

Compiled by Ed Powers
October 2018

These charts show the average number of each species reported for each month. Birds reported only rarely do not have a chart, only a list of occurrences. Frequency refers only to Eagle Marsh; some birds that are rare here are common nearby.

Data was collected mostly from the reports of several birders in the Cornell Lab of Ornithology eBird web site. The period for 2006 to the present is covered.

Max count: highest number seen at one time.

C: Common: occurs >75% of years, in season.

U: Uncommon: occurs 50%-75% of years, in season.

R: Rare: occurs 15%- 50% of years.

V: Very rare: occurs <15% of years.
